

SAT-LOA-20160622-00058

Please, do not discontinue corded or landline telephones! Use of telephones that are wireless or have other voltage on the lines is injurious and painful. The harm is real. Getting rid of landline telephones or corded internet, and replacing them with only wireless communication devices are **barriers preventing access** to family, government, hospitals, businesses, etc. We should have the freedom and ability to access people, businesses, doctors, and government via landline/corded telephones.
Do not discontinue corded or landline telephones!
